

THE BRAINS

“OUT IN THE DARK”

The Brains has never been a band to follow the rules. In fact, the members of the group made a point of utterly destroying every one of these rules with each album they release and every performance they give. These hardworking road warriors have brought their eye-popping live shows to the four corners of the globe. They perform to full houses in Canada, Europe, Mexico and the United States, sometimes even alongside bands like Rancid, Mad Sin, Nekromantix, Offspring, and Reverend Horton Heat. The Brains stand out as a group to watch, by constantly working at mastering their skills. It hasn't been enough for them to earn awards and secure number one spots on music television programs; they are now hell-bent on world domination. Raise your glass and join them in their battle cry for MORE BRAINS!
